From Thursday August 14. to Monday August 18. 1679.

Vienna, Aug. 10.

YEsterday parted from hence Count *Breuner* for *Egra* in *Bohemia*, where, as Commissary of the Emperors Forces, he is to receive and appoint Quarters for the Emperors Troops that are on their march thither from the *Rhine*. The *Moscovite* Ambassadors, who have not been able to persuade this Court to enter into the propoled Alliance against the Turks, are preparing to return home; and Prince *Radzeville* the Polish Ambassador will likewise leave this place in a Fortnight, and take his way for *Italy*. The Letters from *Hungary* speak of a sharp rencounter, which had happeked between some Imperial Troops, and the Rebels, in which several Hundred of the latter had been killed and taken, which did not hinder but that the endeavours to procure a Peace were continued.

Copenhagen, Aug. 15. Letters are come from Admiral *Juels*, giving, as we understand, an account, That sailing the 28th past from *Gotland*, and being the next day off of *Eulant*, he discovered 6 Swedes men of War, which he presently gave chace to, and pursued, till within two miles of *Calmar*, but not daring to venture the Fleet any nearer the shore, he commanded Vice-Admiral *Spaen*, with some light Frigats to follow them into *Calmar Sound*, and there to attacque them, as he did, but the said Ships escaped all, save that called *The Key of the Crown*, mounted with 66 Brass Guns, and 12 Iron ones, who after a Fight of about half an hour ran aground; which notwithstanding, she continued very bravely to defend her self, being assisted with fresh men from ashore, and by the Castle, who played with their Cannon upon the Danes: the Fight lasted above three hours, during which, Vice-Admiral *Spaen*'s ship came likewise on ground, so that he was forced to leave her, and to go on board the *Christianus* IV. but at last the Swedes ship, the *Key*, took fire and blew up, and of all the men in her, which were 550, besides those that were sent on board from *Calmar*, only the Commander in chief, who was a Rear-Admiral, two Lieutenants, and about 40 common Seamen were saved; the Commander was taken up, and carried on board Vice-Admiral *Spaen*, whose first Ship was afterwards got off, though not without much damage. On our side about 100 men were killed and wounded in this action. The King of *Sweden* with most of his principal Officers, is in the Camp before *Elsenburg*, which he besieges. The Swedes attempted the other night to take an Out work, but were repulsed.

Hamburg, Aug. 15. The King of *Denmark* continues to have his Head Quarters at *Pinnenberg*; he was three days since at *Glucksstadt*, and intends to be the latter end of this week at *Rensburg*, to give Audience to an Ambassador from the Czar of *Moscovy*, who is arrived at *Copenhagen* with a great Train. The Danish Forces have enlarged their Quarters, and take up above 14 miles in compass, yet so, as that they can draw together into a Body in 24 hours. Major-General *Uffeln*, who is to be Governor of this City, came hither on Sunday last, and though he demanded a more absolute command over the Soldiers, than the Magistrates were willing to allow, yet have they in this conjuncture, received him for a year upon his own terms. Two men of War are fitting out here, the one of 40, the other of 36 Guns, they will be ready to sail this week, to go and meet our *Greenland* Fleet; and will have Orders to attack no body, but to defend themselves, and the Ships under their charge. We have advice that the Deputies of the Elector of *Brandenburg* at *Ratisbonne*, have put in a very sharp Memorial to the Dyet, wherein they complain, that the Elector their Master, has been forsaken by his Allies, after having hazarded so much for them, and that he has by that means, been forced to make a very dishonourable Peace. The said Elector carries on with a high hand, his pretensions against this City, in which he is assisted by the most Christian King; for we are told that Monsieur *Rebenac*, the French Minister, has received Orders to acquaint these Magistrates, that they will do well to give his Electoral Highness satisfaction; as likewise to desire the Dukes of *Lunenburg*, not to concern themselves in this matter, in favor of the City.

Hamburg, Aug 18. Our Letters from *Copenhagen* confirm the news we had of the loss of a Swedes man of War of 80 Guns, which was burnt in *Calmar Sound*, and most of the men lost; the Danes on their side had likewise a great many men killed and wounded (for the Swedes defended themselves very well) and would have lost more, had not the Swedes ship taken fire, by some accident, as is supposed; The *Suedes* have now in this War, lost four of their greatest ships, *viz.* The *Crown*, the *Sword*, the *Globe*, and the *Key*.

Cologne, Aug. 15. From *Nuis* we have an account, that the French Troops pass daily by that place, on their march from *Wesel* towards *Aix-la-Chapelle*, and the *Meuse*. Letters from *Alsace* say, that the Imperial Troops quitted *Strasbourg* on Wednesday last. That Lieutenant-General *Monclas*, and the Ingenier *Vauban* were gone to *Schlestadt*, to view the new Fortifications that were making there, and to give the necessary Orders for the going on with them. From *Fredericksburg*, the Residence of the Elector Palatine they write, That not only the Lorrain Cavalry which had passed the *Rhine*, and the Imperial Infantry which came from *Trier*, *Worms*, and *Landaw*, and had joyned the said Cavalry, had Orders to stay several days in the Palatinate, the Bishoprick of *Spire*, and the Marquisate of *Baden*, but likewise
